EDUCATION

B.Tech - Computer Science and Engineering

VITAP, Amaravati, A.P.

CGPA: 7.78/10

Oct 2021 – May 2025

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Backend: Django, FastAPI, REST API Development

Frontend: HTML, CSS, JavaScript

Databases: MySQL, SQLAlchemy

Tools & Technologies: Git, GitHub, Docker, VS Code

Core Concepts: OOP, DBMS

Cloud & Platforms: AWS

Soft Skills: Communication, Teamwork, Leadership, Problem-Solving, Attention to Detail, Adaptability, Time Management

PROJECTS

Task Management System with User Authentication

Tech Stack: FastAPI, SQLAlchemy, JWT, MySQL, Docker, Postman

- Built a secure full stack task management application with user authentication and authorization using JWT-based security implementation.
- Developed RESTful APIs for task creation, updating, deletion, and user management with proper request and response handling.
- Demonstrated attention to detail by testing APIs using Postman and performing functional and regression testing to ensure application reliability and correctness.
- Utilized Docker to create a consistent development and testing environment improving deployment efficiency and scalability.
- Implemented efficient database interaction using SQLAlchemy ORM with proper validation and integrity constraints.

Library Management System

Tech Stack: Python, Django, Django REST Framework, MySQL, Bootstrap, Chart.js

- Applied problem-solving skills to architect and develop a full stack library management web application featuring secure user authentication, role based access control for admins, librarians, and members, and comprehensive book inventory management.
- Built RESTful APIs using Django REST Framework to handle book search, availability filtering by genre and author, and real-time loan status updates.
- Implemented automated fine calculation logic based on overdue return dates and integrated email notifications for due date reminders using Django's SMTP support.
- Designed a normalized MySQL relational database schema with optimized foreign key constraints ensuring data consistency across books, members, and transactions.
- Developed an admin dashboard with analytics using Chart.js displaying total books, active loans, and overdue statistics for data-driven library operations.

CERTIFICATES

- Python Certification
- AWS Cloud Practitioner

ACHIEVEMENTS

- Built two end-to-end full stack projects covering backend, database design, API development, and containerization.
- Showcased communication and leadership skills by presenting software development projects at the B.Tech Project Expo to faculty and students.
